PROFILE

I build Laravel and PHP web applications for small businesses, design brand and marketing material, and experiment with AI image and video tools. MSc CSE at Jagannath University (ongoing).

EXPERIENCE

Independent Web, Design and Content Work, Self employed (Feb 2026 to Present)
- Rebuilt the NU CSE student resource website as a JSON driven Bootstrap site.
- Kept developing StockGenie, the Laravel inventory and POS system.
- Produce short video content for a YouTube channel.

Admin & IT Coordinator, Total Engineering and Lifestyle Amenities Co. (TELCo) (Nov 2024 to Jan 2026)
- Managed company IT equipment, network support and daily digital operations.
- Built and maintained the company website with WordPress and Divi.
- Designed brochures, billboards, catalogs, packaging labels and social media graphics.
- Worked with the administration, marketing and engineering teams.

Full-Stack Developer, Independent projects (2023 to 2024)
- Built StockGenie (inventory and POS) and an e-commerce store with Laravel, PHP and MySQL.
- Added login, roles, dashboards, DataTables lists and PDF reports.
- Projects are public on GitHub.

SELECTED PROJECTS

StockGenie (Laravel 11, PHP 8.2, Bootstrap, jQuery, DataTables, dompdf)
Laravel 11 inventory, POS and back office system. Covers products, orders, customers, suppliers, employees, attendance and expenses, with PDF reports.

E-Commerce Platform (Laravel, PHP, Blade, Bootstrap 5, DataTables, Laratrust)
Laravel store with an admin panel. Covers products, categories, orders, low stock alerts and role based access.

Hospital Management System (HTML, CSS, PHP, JavaScript)
Multi page hospital website with separate admin and doctor areas, built with HTML, CSS and PHP.
